

INERT EXPLOSIVES CONCEALED IN ELECTRICAL DEVICES

X-TEST Product No.: AVSEC001

RENEWED

ABOUT THIS KIT

This kit includes IEDs (Improvised Explosive Devices) concealed in electric devices that simulate genuine IEDs, including their four main components – explosives, initiator, operating mechanism and a power source. This kit is constructed based on an analysis of aviation terror incidents and demonstrates the adversary's modus operandi.

TARGET AUDIENCE

This kit and its components are designed for teaching and training of security personnel, conducting exercises and testing the airport security system, with emphasis placed on X-ray screeners and on operators of hold baggage screening systems - such as EDS (Explosives Detection Systems), AT (Advanced Technologies) systems, Multi View Tomography (MVT) and more. Airport security managers and aviation security regulators' Red Teams can test the hand and hold baggage security check system.

* A four-day screeners course is recommended when purchasing this kit.

TECHNICAL SPECIFICATIONS

The kit includes the following simulated IEDs concealed in the following items:

1. Laptop
2. Electric shaver
3. Digital camera
4. 10 inch tablet
5. Hair clippers
6. iPod dock
7. Headphones
8. Hairdryer

*Items may vary according to inventory.

Simulants, packing, accessories and QC specifications:

- The kit contains an instructional booklet including X-ray images and pictures of the concealment process
- Devices can be fully operational upon request
- Quality control includes testing with X-ray and CT machines
