

Safe Passage International introduces the Safe Passage PLUS Program, an innovative training platform designed to optimize the efficiency of training processes while keeping up with changing technology, regulations, and threats. It is designed to provide clients with increased flexibility in order to keep security training current.

The Safe Passage Training Platform provides you with **complete, adaptive, accurate,** and **flexible** security training that will transform your security screeners' skills and sustain their ability to deliver the security performance you require in a constantly changing security market.

Key Features & Benefits

- Updated Courseware - Gain access to the latest version of courseware. Since its inception, Safe Passage has established key industry relationships and agreements with equipment manufacturers, government agencies, and industry stakeholders. When courseware is changed, modified, or enhanced, the most accurate up-to-date training will be made available to you.
- Software Enhancements & Updates - Receive the latest version of the Safe Passage Training Management System. These software updates will ensure you have the latest tools and features needed to maximize the functionality of the Training Management System and to keep pace with industry developments.
- Courseware Migration - We provide a complete and adaptive training platform aligned to your security processes and training objectives. As your needs change so must your training. Safe Passage will migrate your courseware to courseware of equal value at no charge. Safe Passage will future-proof your training investment to meet today's needs and tomorrow's uncertainty.
- Refreshed Image Library - Safe Passage will refresh your image library on a regular basis for most applications to keep screeners engaged and introduce the newest concealment techniques.
- Support Help - To obtain the most out of your Safe Passage PLUS Program, gain access to the latest training webinars, telephone, and electronic assistance for guidance in using courseware and assistance in resolving any issues you may run into.

Innovative Solutions. Superior Training. Accelerated Performance.
