Inert Air Cargo Threat Kit– TSK4000

ITAR Controlled

INERT AIR CARGO (CCSP) THREAT KIT

Accurate: Density, X-Ray and WTMD, Z_{eff}

Technology: Backscatter, Computed Tomography, Single and Multiple X-Ray Generator Systems, mmWave

Approvals: DSA is a DHS/TSA qualified vendor list (QVL) provider for training aids.

The Inert Air Cargo (CCSP) Threat Kit was designed with Cargo and transportation operations in mind. This kit exceeds the performance and capabilities of the current TSA/FAA modular bomb kit. Explosive simulants will generate an automatic detection response on all Air Cargo Screening Technology List (ACSTL) systems. We believe there are no other products on the market that offer the capability and complete functionality that this kit provides. The explosive simulants in this kit are density, Z_{eff} , and X-ray correct to replicate the real threats with which they are associated.
