**Accurate:** Density, X-Ray and WTMD,  $Z_{eff}$

**Technology:** Backscatter, Computed Tomography, Single and Multiple X-Ray Generator Systems, mmWave

**Approvals:** DSA is a DHS/TSA qualified vendor list (QVL) provider for training aids.

DSA Detection's Inert Explosives Threat Kit is the only kit designed to be an accurate representation of the wide variety of explosives most likely to be encountered at security checkpoints around the globe. Inside the provided carrying case are various types of inert pipe bombs, dynamites, plastic explosives, low explosives, high explosives, and homemade explosives (HME). Commercial and Military grade explosives simulants are provided. As with all DSA simulants, these items are density,  $Z_{eff}$ , and X-ray correct to the real threats with which they are associated. Using these simulants, instructors have the ability to teach their students the variations between different explosives in security screening
